

## LENOX® Introduces New Range of Jig Saw Blades

### Innovative Line is Designed for Optimal Performance in Metal and Wood Cutting Applications

**EAST LONGMEADOW, MA** [October 2018] – [LENOX®](#) continues to advance the performance of its power tool accessories, introducing a new range of [Jig Saw Blades](#) designed to deliver optimal performance when cutting a variety of materials including wood, metal and laminate. With the expanded product line covering more applications, LENOX now offers blades to suit the needs of a variety of industries including; Woodworking, Construction, Metal Fabrication, Specialty Trades, Industrial and Maintenance, Repair and Operations (MRO).

When end-users were asked what they look for in a blade, clean cuts, long blade life and durability were their top priorities. The new LENOX Jig Saw range delivers on those needs and offers additional benefits in the form of versatility and straight cutting. For wood-based applications, LENOX Jig Saw Blades feature *POWER BLAST TECHNOLOGY®*, a high-speed blasting process that strengthens the blade to reduce breaks. Proven to be extremely effective on the LENOX range of reciprocating saw blades and industrial band saw blades, this technology delivers enhanced durability to jig saw users as well. The wood cutting range is further strengthened with precision ground teeth to provide the smooth finish users expect.

For common metal cutting applications, such as sheet metal or steel tubing, LENOX Bi-Metal Jig Saw Blades feature the same *POWER BLAST TECHNOLOGY* as well as proprietary T2 Technology™ to provide fast, efficient cutting in a range of applications. For the toughest metal cutting applications, such as steel plate or stainless steel, the updated offering features *LENOX POWER ARC®* Curved Jig Saw Blades. The curved profile of the blade optimizes the angle of attack for fast cutting and provides up to two times longer life than the previous generation when cutting metal.

"At LENOX, we continue to advance our product portfolio to meet the demands of the end-user," said Brian Morrison, Senior Product Manager. "When developing the new LENOX Jig Saw Blade portfolio, we strived to exceed the expectations of our customers, incorporating proven industry-best technology from our other product categories to offer superior cutability. Additionally, the new Jig Saw Blades are manufactured in the USA with global materials. We are proud to manufacture high-quality products domestically."

LENOX Jig Saw Blades can be purchased at LENOX distributors nationwide. To locate a distributor near you please visit [www.lenoxtools.com/FindRetailer/FindDistributor.aspx](http://www.lenoxtools.com/FindRetailer/FindDistributor.aspx).
